FLEX DAM INSTALLATION INSTRUCTIONS

PLEASE REVIEW ENTIRE INSTRUCTIONS BEFORE PROCEEDING WITH THE INSTALLATION.

NOTE: Adhesion may be poor on surfaces (tile) treated with silicone based sealers. Test by peeling back about 1" of liner, press adhesive area to surface it will be installed on and leave overnight. Test adhesion by pushing sideways. If adhesion is satisfactory, pull straight up and proceed with the installation. If not, surface preparation or mechanical attachment will be necessary.

TOOLS AND SUPPLIES NEEDED
Pencil
Scissors or Razor Knife
(2) Alcohol Wipes (INCLUDED)
E-6000 Adhesive (INCLUDED)
Straight edge

INSTALL FLEX DAM AS FOLLOWS:
1. Clean surface with supplied alcohol wipe (MUST BE DRY)
2. Choose the cap that fits your unit.
3. Without removing adhesive liner, place endcap

LEVEL at the curb edge and inside the shower front.
Draw the outline of the endcap on the shower.

Note the distance from the front of the shower for second endcap.

4. Mark on the floor at the embossed arrow and edge of the underside indent at the open end of the endcap.

Repeat steps 2 through 4 with the second endcap at the other side of the shower

5. Draw a line with a straight edge that connects the two marks from step 4.

6. Peel off about 4 inches of the adhesive backing and stick the corner at the two intersecting marks.
7. Using the line as your guide, continue to peel the liner as you gently stretch the material and stick the Flex Dam along the line. When you reach the Arrow mark at the other end, cut off any excess material and firmly press the end to the floor. Move along the length pressing firmly down on both sides of the Flex Dam.

8. Peel the liner off the self-adhesive tape on the endcaps.

9. Apply E-6000 adhesive on the edge around the bottom and inside the front slot.

10. Stick the endcaps inside the the drawn outline. Make sure the upright rubber is slotted properly in the endcap.

Wipe off any excess adhesive and pencil marks with the other alcohol wipe.

Flex Dam used with a heavy duty, weighted shower curtain offers the best water retention system available.
